

Q1. How many Pillars of OOPs? Name them.

there are four pillars in oops

- 1.inheritance ✓
- 2.Encapsulation ✓
- 3.data abstraction ✓
- 4.polymorphism ✓

(2)

28
130

Q3. What is Encapsulation in OOPs?

the encapsulation is a part of oops, it is wrapping data into a single unit and restrict to direct access to data.

✓ (2)

Q4. How many types of Inheritance? Name them.

five types of inheritance

- 1.single inheritance ✓
- 2.multiple inheritance ✓
- 3.multilevel inheritance ✓
- 4.hybride inheritance ✓
- 5.haiaarchil inheritance ✓

(2)

Q8. How many types of Variables in OOPs?

there are two types of variables

- 1.instance variable ✓
- 2.class variable ✓

(2)

Q9. How many types of Methods in OOPs Name Them?

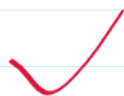

there are three types of methods in oops

- 1.class method ✓
- 2.instance method ✓
- 3.static method ✓

(2)

Q10. Name access modifier in Encapsulation?
there are three access modifier in encapsulation

1. public
2. private
3. protected

Q12. What is super () in OOPs

it is a used in parent class inside the child class

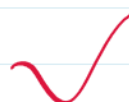

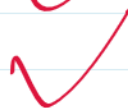

Q13. How many steps to read a file using python? Write steps?
there are three steps to read the file

1. open file: file = open("file.txt", 'r')
2. read the file: content = file.read() print(content)
3. close the file file.close()

Q14. How many steps to write a file using python? Write steps?
there are three steps write a file

- open the file: file = open("file.txt", 'w')
- write the file: file.write("hello rudra")
- close the file: file.close()

Q15. Write code to checking files is exists or not in your pc drive?

```
import os
```

```
if os.path.exists(r"D:\Games\Call of Duty - Modern Warfare II
```

```
\_start_singleplayer.bat"):
```

```
    print("path is exist")
```

```
else:
```

```
    print("path is not exist")
```

```
-----
```

output:

path is exist

Q16. Write a program to read CSV file using Python?

```
import csv
```

```
file11 = r"C:\Users\vt998\Documents\FrameView.csv"
```

```
file = open(file11,'r')
```

```
read11 = csv.reader(file)
```

```
print(read11)
```

Q17. What is mode "w" and mode "a" in writing files?

1.w(write) = it is create a file and overwrite a file.

2.a(append)= it is an add data in end of the file

Q18. What is difference between "w" and "x" mode in writing files?

difference:

1.w = it is a create a file or overwrite an existing file.

2.x = it is a create file if error exists

Q20. Write a lambda that checks if a string starts with "A"? ["apple", " carrot", " Apple"]

word11 = ["apple", " carrot", " Apple"]

A = lambda s: s.strip().startswith("A")

print(list(map(A, word11)))

output:

[False, False, True]

Q21. Extract all vowels from the string using list comprehension: text

"Comprehension"?

text111= "Comprehension"

vowel=[ch for ch in text111 if ch in "aeiouAEIOU"]

print(vowel)

output:

['o', 'e', 'e', 'i', 'o']

Q22. Given a list of words extract words, extract words that contains the letter 'e'

words= ["tree", "book", "python", "sky"]

e1= [word.strip() for word in words if 'e' in word]

print(e1)

output:

['tree']
